

Tubal Reversal Success Stories

Summer

Summer had a tubal ligation in October 2006. Dr. Rosenfeld performed a tubal reversal in December 2008. Eight months after the tubal reversal surgery, Summer became pregnant. She delivered a baby girl in March 2010.

I had my tubal reversed by Dr. Rosenfeld and was pregnant eight months later. I delivered a beautiful baby girl, which is a true miracle! She has three older brothers that are just as thankful as we are for her. My husband and I have been married ten years and had a change of heart after having my tubes tied in a C-section after our third son.

Dr. Rosenfeld is an angel and a miracle worker here on Earth. Without him, we wouldn't have our precious Savannah!

Teresa

Teresa

had a tubal ligation in 1989. Dr. Rosenfeld performed a tubal reversal in early 2004. Less than ten months after the tubal ligation reversal surgery, Teresa conceived. She delivered a baby girl in July, 2005. In March of 2007, she gave birth to a boy.

"I

am writing to thank you for the role you played in bringing my two beautiful children into the world. My tubal ligation reversal surgery went well and I had a rapid recovery (I was back at work the following week). I achieved pregnancy soon after the surgery and have given birth to two wonderful babies since the reversal. I never thought I would want any more children and even feared being pregnant during my forties, but we can't always predict how circumstances or our minds will change. The ease with which this all transpired convinced me that I was doing what destiny had in mind all along.

I

am still overwhelmed that a simple surgical procedure brought two

children into my life who fill my heart with joy. Dr. Rosenfeld's intercession and skill brought these unique individuals into this world. No amount of praise or credit is sufficient reward for facilitating such a miracle."

April

April had a tubal ligation and Dr Rosenfeld performed a tubal ligation reversal in March, 1990. April gave birth to a baby girl in March, 1992 and baby boy in July, 1996.

"I just wanted to write to you - to thank you once again for another baby and for the marvelous treatment I received at your practice. I never thought I would be able to get pregnant again after my tubal ligation, let alone at thirty-eight! The repair has lasted so much longer than we thought it would and I have you to thank for my two youngest children, who are both so happy and healthy. I never could have made my family complete without Dr. Rosenfeld and his miraculous tubal reversal surgery. Thanks again!"

Shaun

Shaun had a tubal ligation in 1988 and Dr Rosenfeld performed a tubal reversal surgery in June 2005. Shaun delivered a baby boy in May 2007.

"We just wanted to let you know that because of Dr Rosenfeld, my husband and I have a great little boy. At age thirty-nine and having my tubes tied for eighteen years, I still held out hope for a baby and traveled across the country for an appointment with your office in Houston. My husband was in Iraq at the time of the surgery so having a child together after his tour was complete became really important to us. Less than a year after he returned, only eighteen months after my tubal reversal, we conceived and I gave birth to our son in May.

You have the most amazing staff and they made me feel very comfortable during the surgery, though I was alone and a long ways from home. Again, thank you, Dr. Rosenfeld, for being so good at what you do. And thank you for helping us bring our little miracle into this world."

Donna

Donna had a tubal ligation using the pomerooid technique in 1986. Dr. Rosenfeld performed a tubal reversal in 1994 and she conceived soon after the surgery, delivering a baby girl in February 1995 and in April 1999, gave birth to a baby boy.

"When I was only nineteen, my mother convinced me to have my tubes tied. I had just taken a sedative after giving birth to my second child and they gave me three minutes to make the decision before the doctors wheeled me in for the surgery. I was confused and shaking, and felt I was not

in a position to say no to the doctors or my mother.

Five years later I remarried and assured my new husband that we could reverse my tubal ligation. After doing some research, I knew that tubal reversal success rates were only about fifty or sixty percent. I thought that if I could just find the right doctor, then we had a chance.

A co-worker referred me to Dr. Rosenfeld and after my first appointment, I felt like I had real hope. My hope became reality - five weeks after the surgery, I discovered I was pregnant. I have two blessed children as a result of Dr. Rosenfeld's skills and am so thankful I chose him.

Dr. Rosenfeld is highly respected and for good reason. Not only does he use the latest surgical techniques and advanced medications, but he helps you work through your emotions and fears. He expects a lot from his staff and they always deliver. Everyone puts a lot of care into what they do and his office is full of joy and laughter. Thank you, Dr. Rosenfeld. I hope other women will find this referral and discover HOPE on Fannin."

Patricia

Patricia had a bilateral tubal ligation in 1991 and Dr Rosenfeld performed a tubal reversal surgery in May, 2003. Patricia gave birth to a baby girl in January, 2005.

"My husband and I are so thankful that we found Dr. Rosenfeld, who reversed my tubal ligation. The reversal surgery gave us the most precious angel, our daughter. Dr Rosenfeld and every member of his staff took exceptional care of me before and after the surgery as well as during my entire pregnancy. Everyone at the office was so attentive - I never felt like just another patient. I recommend his practice to anyone considering a tubal reversal or having a baby. Once again, thanks Dr. Rosenfeld for making our dreams come true!"

Kelly

Kelly had a tubal ligation and Dr. Rosenfeld performed a tubal reversal surgery. Kelly delivered a baby boy in September,

2005.

"I just wanted to thank you for helping my husband and I to conceive our little miracle baby. Your tubal reconstruction made this pregnancy possible and we would not have our beautiful boy, our most precious gift, without you. Our son is such a blessing. We can never thank you enough."

Bethany

Bethany had a tubal ligation, where the tubes were cauterized, in 2001. Dr. Rosenfeld performed a tubal reversal in December, 2006 and Bethany delivered a baby girl in August, 2007.

"My husband tragically lost his first wife and son and though I had my tubes tied six years ago, I wanted grow our family together. I traveled to see Dr. Rosenfeld because after all I had read and heard, I really believed in him. Only weeks after my tubal reversal surgery, my husband and I shared joyful tears...we were pregnant! Thank you Dr. Rosenfeld, and your staff, for giving us a second chance. We will never forget you."

Angela

Angela had a tubal ligation, where the tubes were cauterized, in 1997 and Dr. Rosenfeld performed a tubal reversal in December 2007. Angela delivered a baby girl in June 2009.

"We LOVE Dr. Rosenfeld and his helpful, supportive staff. After my first tubal reversal surgery in December 2007, I found out my tubes were "short" and I became convinced that I would not be able to get pregnant, especially since my tubal ligation had been ten years before the reversal. Nine months later we got our first positive pregnancy test! A healthy and beautiful baby girl has just blessed us because of the surgery. I feel like Dr Rosenfeld can help you achieve pregnancy under almost any situation. Thank you!"

Lynn

Lynn had a tubal ligation seventeen years before Dr. Rosenfeld performed a tubal ligation reversal surgery. She delivered a baby boy in March 2008.

"Thank you Dr. Rosenfeld and your entire staff for the wonderful job you did with my tubal reversal. The surgery was well worth the day's drive. Again, thank you for helping us get pregnant after seventeen years!"

Victoria

Victoria had a bilateral tubal ligation in 2002 and Dr. Rosenfeld performed a tubal ligation reversal in April, 2006. Victoria delivered a baby boy in May 2007.

"Only four months after having Dr. Rosenfeld untie my tubes, I got pregnant. My husband and I were so happy and grateful that this simple surgery could make all of our dreams come true. The surgery itself went very well and I did not experience much pain because of the Q Pain Pump (every woman should have the Pain Pump after her operation). My husband was able to take the pump out once we were home and I was up and around only two days after the surgery. I even had an easy pregnancy and now we have a wonderful little boy. I highly recommend Dr. Rosenfeld if you are looking for a doctor to do your tubal reversal. His staff are all very sweet and they are with you every step of the way. Thank you so so so much Dr. Rosenfeld for helping us to bring our handsome boy into the world."

Jacqueline

Jacqueline Rideaux had a tubal ligation in 1986 and Dr. Rosenfeld performed a tubal reversal in 1995. Jacqueline delivered a baby boy in 1999.

"Dr. Bernard Rosenfeld's tubal ligation reversal was a great success. We had our bouncing baby boy in 1999 and he is now nine years old and in the fourth grade! We are very thankful for the hope, happiness, and joy you have brought to our lives."
